sensors special issue emerging iot technologies  
for

June 6th, 2020 - the internet of things iot is a rapidly evolving technology that is changing almost every business and aquaculture is no exception in this work we present an integrated iot platform for the acquisition of environmental data and the monitoring of

---

---

aquaculture environments supported by a real time munication and processing network'

*'remendations based on semantic analysis of social*

*June 4th, 2020 - remendations based on semantic analysis of social networks in learning environments e learning systems have benefited*

---

---

*greatly from the concepts of the social web and the emerging technologies of the web semantic humans have been anized together by nature at the rate of the need to work and live in a munity'*

**'emerging technologies for semantic work environments**

---

May 23rd, 2020 - emerging technologies for semantic work environments techniques methods and applications describes an overview of the emerging field of semantic work environments by binning various research studies and underlining the similarities between different processes issues and approaches in order to provide the reader with techniques methods and applications

---

---

of the study'

'emerging technologies for semantic work
