*10 possible reasons why humans evolved toptenz net
June 3rd, 2020 - before we start let s look at three mon
misconceptions about human evolution the first is that
humans evolved from apes gorillas or chimpanzees
while we do share a lot of dna with them they are
actually more like our evolutionary cousins we share a
mon ancestor but split from their evolutionary path
about six to seven million years ago then over the next
several million years'*

'human evolution stages amp timeline britannica

June 6th, 2020 - human evolution the process by which human beings developed on earth from now extinct primates viewed zoologically we humans are homo sapiens a culture bearing upright walking species that lives on the ground and very likely first evolved in africa about 315 000 years ago we are now the only living members of what many zoologists refer to as the

human tribe hominini but there is abundant"**a new reality human evolution for a sustainable future**
