Immunological Memory David Gray Springer

May 1st, 2020 - Although immunologists know rather a lot about the manifestation of immunological memory an understanding of the mechanism of memory at cellular and biochemical levels eludes us Indeed as we shall see it is not even clear which of the several models used to explain the working of memory' Immunology of Bats and Their Viruses Challenges and

April 8th, 2020 - 1 Introduction Bats belong to Chiroptera the second most species rich order of mammals with more than 1100 species Genomic evidence suggests that bats share most features of other mammals 2 3 4 however they have other anatomic and behavioral features that appear to be unique and some of those may be essential for hosting infectious agents'

'Frontiers T Cells in Vascular Inflammatory Diseases

April 30th, 2020 - Inflammation of the human vasculature is a manifestation of many different diseases ranging from systemic autoimmune diseases to chronic inflammatory diseases in which multiple types of immune cells are involved For both autoimmune diseases and chronic inflammatory diseases several observations support a key role for T lymphocytes in these disease pathologies but the underlying mechanisms'

'A Prof Daniel Gray University of Melbourne

April 13th, 2020 - Our laboratory studies how the immune system decides to attack invading microbes but not to attack our own ans Defects in this decision making process can cause immunodeficiency or autoimmune diseases such as multiple sclerosis or type 1 diabetes We have found that the programmed destruction of immune cells is an important part of this decision making process'
