- Answer CF A is false if the motion is in a circle at constant speed the net force is perpendicular to the direction of motion and there is neither a component parallel nor anti parallel to the direction of

motion' 'Celestial mechanics Wikipedia

May 4th, 2018 -

Celestial mechanics is the branch of astronomy that deals with the motions of celestial objects Historically celestial mechanics applies principles of physics

classical mechanics to astronomical objects such as stars and planets to produce ephemeris data'

'PhysicsLAB The Law of Universal Gravitation

May 5th, 2018 - The

Law of Universal Gravitation states that every object in the universe attracts every other object in the universe with a force that has a magnitude which is directly

proportional to the product of their masses and inversely proportional to the distance between

**their centers
squared' '**
