### a prehensive review on protection challenges and fault

**May 24th, 2020 - the protection devices in pv systems may fail to detect line line faults particularly in the following aspects 1 when the level of mismatch is below 20 the magnitude of the fault current will be significantly low and it may deceive ocpd 2 the presence of mppt drastically reduces the magnitude of the fault current and hence faults may remain undetected in the pv array for an indefinite'**
