'scan less confocal phase imaging based on dual b microscopy

June 5th, 2020 - confocal laser microscopy clm is a powerful tool in life

science research and industrial inspection because it offers two dimensional optical sectioning or three dimensional imaging capability with micrometer depth selectivity furthermore scan less imaging modality enables rapid image acquisition and high robustness against surrounding external disturbances in clm'

'optical microscopy davidson and abramowitz optical microscopy June 4th, 2020 - powerful contrast generating microscopy theory in 1955 15 this technique is monly referred to as nomarski interference or differential interference contrast dic microscopy and along with phase contrast has allowed scientists to explore many new arenas in biology using living cells or unstained tissues robert"theory and practice of scanning optical microscopy nasa ads
