**scientific soapmaking
bridges the gap between
the technical and craft**

literature it explains
the chemistry of fats
oils and soaps and
teaches sophisticated
analytical techniques
that can be carried out
using equipment and
materials familiar to
makers of handcrafted
soap' 'how to ph test soap
the right way modern
soapmaking

May 31st, 2020 - ph
testing handmade soap
typically shows a result
between 8 and 10 but can
creep up near a ph of 11
as far as i m aware and
have been able to find
scientific evidence for
the important part it is
impossible for a handmade
soap to fall near neutral
or below without using an
emulsifier to keep the
soap molecules within the
solution i know that
soapmakers frequently
state that they can'
