June 3rd, 2020 - so if the original transistor was a bc149 it s best to use a bc109 or bc549 as a replacement although in practice the difference in noise might be negligible likewise if the original was a bc147 then check the circuit carefully to see what voltage the transistor might be subjected to and replace with a bc107 or bc547 if in doubt'

'understanding transistor replacement substitution and

June 1st, 2020 - searching the right transistor for substitution is a skill if you replace wrong specifications of transistor into the equipment it may burn in less than couples of seconds substitute with the correct part number the equipment will work for a long time and sometimes the substitute transistor will even work better than the original part number'
