earthquakes in this book'

'science for kids earthquakes

May 25th, 2020 - earthquakes usually occur on the
edges of large sections of the earth's crust called
tectonic plates these plates slowly move over a long
period of time sometimes the edges which are called
fault lines can get stuck but the plates keep moving
pressure slowly starts to build up where the edges
are stuck and once the pressure gets
strong'' earthquakes kean university

May 22nd, 2020 - 2 introduction earthquakes
represent the vibration of earth because of
movements on faults the focus is the point on the
fault surface where motion begins the epicenter is
the point on earth's surface directly above the
focus the deadly izmit earthquake struck northwest
turkey on august 17 1999 at 3 a m over 14 000
residents of the region were killed as poorly
constructed'' *what is an earthquake nasa space place*
nasa science

May 26th, 2020 - *an earthquake is an intense shaking
of earth's surface the shaking is caused by
movements in earth's outermost layer why do
earthquakes happen although the earth looks like a*

pretty solid place from the surface it s actually extremely active just below the surface'
