**'Cleft Lip Management Protocol at the Royal Jordanian**

April 6th, 2020 - Objective Cleft lip is a common congenital anomaly in  
our population It imposes serious psychological and social disturbances  
in both children and their families Centralization of cleft lip care  
led to the great evolution of pre surgical orthodontist management and  
the continuous rejuvenation in surgical techniques hence primary cleft  
lip repair with primary rhinoplasty has been the '**Velopharyngeal

'Velopharyngeal Function and Dysfunction VPI Clinic

April 30th, 2020 - Figure 4 shows velopharyngeal insufficiency (VPI). This disorder is caused by an abnormality of the structures and is most common in children with a history of cleft palate or a submucous cleft under the skin. Velopharyngeal insufficiency can also occur after adenoidectomy, although the incidence is rare, about one in 2,500 cases. Complete Cleft Care: Cleft and Velopharyngeal Insufficiency

April 15th, 2020 - Complete Cleft Care is a comprehensive step-by-step guide to the assessment and treatment of patients suffering from cleft and velopharyngeal disorders. It covers multiple treatment modalities such as unilateral and bilateral cleft lip repair, secondary speech assessment and surgery, cleft rhinoplasty, gingivoperiosteoplasty, and
