victims survive in a

May 22nd, 2020 - the human body has  
an affinity for co approximately 250  
times to one pared with oxygen cells  
begin to die and the body s ability to  
function and move is quickly impaired  
cyanide impairs'

'explosive depression and vacuum  
exposure

May 21st, 2020 - it is very unlikely that  
a human suddenly exposed to a vacuum  
would have more than 5 to 10 seconds  
to help himself if immediate help is at  
hand although one s appearance and  
condition will be grave it is reasonable  
to assume that repression to a tolerable  
pressure 200 mm hg 3.8 psia within 60  
to 90 seconds could result in survival  
and possibly in rather rapid recovery'

'meridian institute home page

May 26th, 2020 - cayce repeatedly  
insisted that such infectious agents do  
not thrive in an alkaline environment  
when asked how to prevent colds cayce  
replied by keeping the body alkaline  
only in acids do colds attack the body  
3248 1 cayce remended using litmus  
paper to test the ph of urine and saliva
