biometric technology regulatory and  
privacy concerns

May 21st, 2020 - the recent surge in  
biometric privacy lawsuits have  
caused law firms to create specialty  
groups and hire attorneys solely to  
address biometric privacy litigation  
19 ultimately the biometrics industry  
has bee increasingly pertinent for  
public and private groups alike''*nec  
describes new i delight platform for  
touchless*

May 5th, 2020 - solutions to support  
the new normal of public health  
concern must make touchpoints  
contactless and provide a scalable  
biometric platform for hygienic  
customer experiences *nec argues in a*

---

---

*whitepaper the 7 page vision of a touchless world whitepaper positions nec s i delight as the secure and scalable digital identity management platform for a wide range of use cases'*

**'biometrics the game changer in access control idemia**

June 1st, 2020 - the access control market is shifting to biometrics for security managers the question is no longer should i use biometrics but rather which biometrics should i use idemia brings seamless access control to every access point with morphowave pact by idemia a mind blowing high tech touchless 3d fingerprint

**reader'' a study of touchless fingerprint recognition system**

May 28th, 2020 - for these reasons a touchless fingerprint recognition system has been investigated in which a fingerprint image can be captured without contact while this system can solve the problems which arise through contact of the user s finger

---

---

other challenges emerge for example low ridge valley contrast and 3d to 2d image mapping'

**'a study of touchless fingerprint recognition system**

**May 22nd, 2020 - fingerprint recognition systems are widely used in the field of biometrics many existing fingerprint sensors acquire fingerprint images as the user s fingerprint is contacted on a solid flat'**

**'fingerprint cards ab expands its fingerprint**

**June 3rd, 2020 - touchless biometric systems in demand the trend has translated into a sharp decline in purchase of touch modality and a sharp increase in the demand for touchless systems says alex zarrabi president of touchless biometrics systems tbs biometrics solutions are being affected unequally depending on whether they involve touch sensing he says''invisium touchless biometric solutions for workforce**

---

---

June 1st, 2020 - invixium is ready and well equipped to provide consulting to security architects and project administrators on the adoption or migration to touchless biometrics via our titan offering the need for touchless access control and workforce management biometric solutions is the new reality which builds a new business case for the deployment of face recognition technology'

**'consumer acceptance of biometrics growing veridium**

May 11th, 2020 - in fact if a high end smart phone doesn't get shipped with a fingerprint sensor that bees news however growing acceptance of biometrics is not confined to fingerprint sensors on smart mobile devices there is growing evidence that biometrics is being a very popular method to prove identity across a wide range of technologies'

**'preprocessing algorithm research of touchless fingerprint**

---

---

May 1st, 2020 - abstract touchless fingerprint recognition with high acceptance high security hygiene advantages is currently a hot research field of biometrics but because of the different image principle of the non contact fingerprint image and contact fingerprint image the difference of the two fingerprint image is large'

*'top 10 iris recognition panies in the market*

*June 3rd, 2020 - the contactless biometrics like iris recognition facial recognition palm vein recognition contactless fingerprint and voice biometrics involves touchless technology for identity verification access control payments and transactions without any physical user engagement due to the recent high percentage of adoption of touchless biometrics systems by enterprises institutions'*

**'biometric access control system bacs**
