### raku firing clay and glaze chemistry ceramic arts

May 27th, 2020 - hello again yesterday i fired my zen kiln with some good results some bad my question is in daylight do you see the pots glow i got my kiln up to 2100 degrees and some pots looked glossy but did not glow a bright orange even when looking through the peep hole and some glaze just looked matt and never looked glossy raku burst and lithium slip glaze when i took the bowl out of the kiln'

### 'raku kilns studio operations and making work ceramic

April 25th, 2020 - i once built the classic updraft wood fired raku kiln but basically used it to fire burnished work in the local clay was extremely fine

---

**particle 300 million year old earthenware clay all you had to do was rub it with a soft cloth to get a burnished surface the kiln was made out of brick covered with a layer of clay and i had construction crews dump wood off at the house"learn about my raku glaze raku art inc**

**May 18th, 2020 - let the temperature build back up before you pull the next piece take your time pulling do not rush you can hold the piece out in the air to get lighter colors make sure you stand the piece up in the can and it does not fall over i use electric kilns to raku because raku needs to be fired in oxidation if you use gas never fire in reduction'**
