'Understanding the Circular Flow Model in Economics

May 3rd, 2020 - The circular flow model is an economic model that shows the flow of money through the economy

The most common form of this model shows the circular flow of income between the household sector and the business sector. Between the two are the product market and the resource market. Households purchase goods and services which businesses provide.

'Rethinking plastic packaging towards a circular economy

May 1st, 2020 - We want to lead the way in our approach to our products and packaging and to the business models and systems in which plastics play a part. Moving towards a circular economy. At the heart of the plastic waste problem is the linear 'take-make-dispose' model of consumption which means products get manufactured, bought, used briefly and then thrown away.'

'Consumer acceptance of circular business models

April 30th, 2020 - Society has been operating in a linear way which implies rapid waste generation. Previous research has shown business models able to reclaim products at end of use are currently poorly developed and implemented. A shift should be made to Circular Business Models (CBM) that focus on the re-use and recycling of materials.'

'Circular Economy: How SMEs can participate. The Edge Markets

May 2nd, 2020 - Circular economy business models involve rather simple concepts. For instance, consider your waste as a resource that can be turned into raw material. Design your products so it can be reused, repaired, or remanufactured. And do not let your waste go to the landfill. But how can businesses change their models from a linear 'cradle to grave' to a circular one 'cradle to cradle'?
